- Labelling your parcel:**
- Find your destination on the map and identify the coloured zone
  - Refer to the parcel ruler above and apply relevant labels based on your parcel weight
  - Refer to the respective coloured zone tables for label rates

- Transit times:**
- |                                      |                             |
|--------------------------------------|-----------------------------|
| Local delivery - Next delivery cycle | Within Island - 1 day       |
| Inner shorthaul delivery - 1 day     | Inter Island - 2 days       |
| Outer shorthaul delivery - 1 day     | Rural - Additional 1-3 days |

Maps not to scale. Blank satchels for electronic customers will incur a packaging cost.  
\* Minimum purchase requirements apply. Base rate only. Does not include any additional fuel surcharges if applicable. Visit fastway.co.nz for details.  
\* Estimated transit times in working days.  
\* Local satchels available for delivery in the Pink Zone only  
¹ Rural destinations determined by Fastway Couriers. This is additional to the standard base label.  
Prices exclude GST. Effective as at 1 July 2018

**Working out your chargeable weight**  
Your parcel delivery is calculated on the cubic weight (size) or the actual weight – whichever is greater.

a. Convert measurements to metres

Example: if a parcel is:  
Height: 80cm > 0.8m  
Width: 50cm > 0.5m  
Length: 33cm > 0.33m

b. Multiply the height x width x length x cubic conversion (200) = cubic weight

Example: 0.7 x 0.4 x 0.33 x 200 = 18.48kg

c. So if the actual weight is 5kg and the cubic weight is 18.48kg – the greater weight of 18.48kg is used to select the label/s.
